linkedin.com/in/stevefazekas / stevefazekas.com

Career Summary:
Providing expertise in UX Design, UI Development, Web Application Architecture, Content Marketing & Analytics

9/2019 - Current
Fozzies Wheels
www.fozzieswheels.com/app
The site & app admin will be a gel of my experience in Shopping Cart design, Single Page App (SPA) design, JavaScript app design, and UX component design – the app will be an eCommerce data and content admin as the foundation of an aftermarket wheels eCommerce platform hosting multiple sites. Design and development is in progress for the customer facing site. About 40% of time spent up to this point is on architecture of the database, views, product data & image testing. Another 40% is coding solutions to challenges in the app architecture, and 20% data / image acquisition and formatting.

4/2019 – 8/2019
JEGS.com
Front-End UX/UI Designer & Developer (Direct / 1099)
Delaware, Ohio

Redesign JEGS.com JavaScript app framework and front-end UI components using Node, Gulp & SASS with a JSON / namespace model for organizing JS code. Rebuilt Mobile & Desktop navigation to use a singular HTML codebase, including Accessibility patterns. Sped up page load by delaying third party JS & events. Designed and promoted UI concepts in prototype format to the team prior to building out UI functionality.

11/1/2018 – 3/16/2019
Firmatek
Remote Developer, Contractor (Direct / 1099)
Columbus, Ohio

Worked on a remote project for Firmatek out of Austin, TX, utilizing full-stack JavaScript, Node.js, TypeScript, Postgres DB (latest), and a spattering of npm packages including use of WebSockets / Server less design to produce an application portal for drone photo uploads and 3D mapping for employees and clients. A third-party vendor "solutions team" specializing in 3D volumetrics is continuing the project.

3/15/2018 – 10/26/2018
Abercrombie & Fitch
UI Front-End Developer, Contractor (FastSwitch Consulting)
New Albany, Ohio

UI Development Accessibility Specialist on the "Product Page" dev team utilizing a Java-based server architecture having JSP / JSPF templates with JQuery and HandleBars templates on a Node (NPM) and Grunt task compilation process. Tasked with updating web page components with Accessibility features for A11Y and Section 508 compliance. Dev Toolsets: Vagrant virtual machine on a Mac environment, GitHub, VS Code, Terminal processes, & SmartGit in an Agile team setting. UX: use of InVisionApp for "Atom - Molecule - Organism" level design for building "Design System" components.

5/2014 – 12/15/2017
Alliance Data Systems
UX / UI Developer, Contractor (Randstad Tech)
Columbus, Ohio

Front-End Specialist:

Creative Technologist on the development team, inspired by prototype development and front-end component creation for the application development process. Created and presented prototype components utilizing page flow and decision paths which included error states, modals, popups, and helpers as well as mouse, keypress, and click events. Created a Ruby-based prototyping application built on Sinatra to utilize JavaScript and SASS/CSS as implemented on production, allowing prototype front-end code to be used in development.

App & Content Development:
Designed, developed & implemented a ground-up JavaScript front-end application utilizing a JSON style modular design in conjunction with a custom SASS integration to build out CSS for 300+ clients on top of SDL Tridion (CMS) and Weblogic JSF / XHTML web components. Wrote customized web components for CMS and APP use. Wrote and implemented a custom Adobe DTM module for event tracking of specific types – PageLoad, AJAX updates, click events, step processes (start to completion), etc.

Examples: stevefazekas.com/resume/docs/AdobeDTM.doc

Skills & Tools: HTML, JavaScript, jQuery & plugins, Adobe DTM, SASS/CSS (w/Java Maven), Gulp w/Jasmine & Karma for JS unit tests, Ruby w/"Rack" Server, SmartGit, Confluence, Photoshop, Illustrator

10/2013 – 5/2014
Nationwide Insurance
UI Developer, Contractor (TekSystems)
Columbus, Ohio

Specialist for desktop / adaptive website conversion to a Responsive (RWD) Web Design by modifying CSS for media queries, JavaScript / jQuery code while keeping existing HTML templates intact. Responsibilities included writing new SASS/CSS, utilizing JS libraries for RWD, and providing & implementing recommendations for improvement on speed. Usability testing as well as browser and device-specific testing during each dev stage.

7/2012 – 8/2013
Lead Front-End UI Designer / Developer - Endign
Dublin, Ohio

Design and coded the front-end of an SPA (single page application) which utilizes a JSON based .NET webservice to communicate the view layer displayed and updated using AJAX calls utilizing a jQuery interface. JSON data attributes communicated business logic for the display of data and the functionality available to the user, such as create, edit, and delete functions.
JavaScript, jQuery, HTML, CSS3, some C# .NET

10/2008 – 6/2012
Senior Web Designer - Manta Media (Manta.com)
Westerville, Ohio

Responsible for front-end design implementations including coding for the presentation layer utilizing the perl module for Template Toolkit, CSS & JavaScript/jQuery libraries. Developed Manta.com user interface including Company Search Results, individual Company Info pages, Company Claim forms, Member Profile (user login areas), Member Badge, and many other areas of the site. Major projects include Manta.com redesign in June 2010 and Connect.Manta.com (built on PHP BB) in 2011.

6/2008 – 8/2008
Programmer Consultant (Kforce) @ Ologie
Columbus, Ohio

UI & Web App programming of MeetTheBuildings.com, a Cleveland Clinic microsite, with a focus on building a file-based blogging page in addition to building of site files and layout. Responsible for setup and build processes for each update to the webserver.

UI & Web App programming of ColumbusGreenSpot.org, a City of Columbus microsite, having a focus on a dynamic 5 step application to become a "GreenSpot" in Columbus. Responsible for building all site pages, testing UX functionality, webserver & database setup, and delivery of code & database to the City of Columbus development team.
